

WHAT IS ENRICHMENT AND WHY IS IT IMPORTANT?

The key to your dog’s happiness and health is regular exercise and enrichment. Enrichment for dogs means to stimulate their brains through problem solving, playing, chasing, smelling, chewing, and scavenging. At The Dog Stop enrichment is especially important for dogs who can't go into or don't enjoy daycare as well as new puppies to work on socialization and introduction to the daycare environment. Through out their time here our Enrichment Specialist works with those dog enrolled in the program engage in activities such as puzzle time, snuffle and licki mats, treadmill time, pond time, flirt pole, and ball pit time. We also offer small and more customized group play for those who are social but just don't enjoy daycare or who are new to the daycare environment and who we are trying to acclimate to the daycare process. This slower process of introducing younger or less social dogs to daycare helps to make it a healthy and happy transition and allows ample time to figure out if daycare will be an enjoyable experience for them or if they will enjoy continuing with the enrichment program more.
